

Kevlar Scissors

Fig.1: Kevlar Scissors

Description:

Kevlar is widely used as a strength member in the patchcord and pigtail to improve the tensility. Kevlar is a high tensile material, and normal tools can hardly cut it. So, a special tool is very essential. GW-09 Kevlar Scissors are specially designed for cutting this Kevlar strength member.

Features:

1. Ergonomic design, comfortable for handling
2. One micro-serrated blade reduces slippage for more positive cutting action

Specification:

Dimension (mm)	145*75*18
Weight (kg)	0.1
